iagon

Brand Intro.

Mission

The World We're Building Toward

A world built on self-sovereign data, where every person, business, and institution controls what's theirs, by design.

Our Vision is not a description of our product, it's a description of the world our product makes possible. Data is the substrate of modern life: our health, our finances, our work, our identity, our institutions. Today, most of that data lives on infrastructure we neither own nor govern. We believe that is a historical accident, not a permanent condition. Self-sovereign data is the property a world has when its people, companies, and institutions can control what's theirs, not by permission, not by process, but by the architecture of the systems they rely on. That is the world Iagon exists to build.

Vision

How We Get There

We're building the Shared Storage and Compute Economy, a global, decentralized infrastructure layer where data ownership, compliance, and control belong to the people who create the data, not the platforms that store it.

Our mission names the category we're creating: the Shared Storage and Compute Economy. It's an economy because it turns the world's idle digital resources into shared infrastructure. It's decentralized because no single entity should control the data of billions. And it's compliant by design because privacy, sovereignty, and regulation are not features we add, they're the foundation we build on.

What We Say

DNA Anchors

Three phrases that carry the load of everything Iagon communicates. They earn a place in headlines, keynotes, pitch closings, and investor decks. Every piece of external language should ladder up to at least one of them.

Emotional Anchor

Your Data, Your Control, Your Future.

The line we leave people with. Use at the end of manifestos, campaigns, keynotes.

Rational Anchor

Compliance by Design, not by Process.

The line that wins enterprise trust. Use in sales decks, product pages, regulatory briefs.

Strategic Anchor

Designed for Enterprise, Built for Everyone.

The line that names our market position. Use in partnership briefs, presentations, category-defining moments.

How We Work

Core Values

Five principles that govern how we make decisions, build products, hire, and serve customers. Every value is tied to the DNA anchor it proves. If a decision doesn't honor these, we don't make it.

Proves Emotional Anchor

Sovereignty First

We default to giving users control, even when it's harder to build. Sovereignty is not a feature we add, it's the constraint we design against from day one.

Proves Rational Anchor

Build it Right, not Fast

We'd rather ship later than ship compromised. In infrastructure, shortcuts become tomorrow's breaches. Our customers' data is mission-critical, our standard must match the stakes.

Proves Strategic Anchor

Earn the Hard Customer

We optimize for the customer with the highest standards, banks, healthcare, regulated enterprise. If we can serve them, we can serve anyone. This is why we're Designed for Enterprise, Built for Everyone.

Proves Rational Anchor

Verifiable by Design

Trust in infrastructure is not claimed, it's demonstrated. We publish what proves the system works: patents, audits, on-chain economics, governance, and architectural reviews. What we protect, we protect openly, and explain why.

Proves Rational Anchor

Own The Outcome

Every team member is accountable for what the customer experiences, not just their slice of the stack. Decentralized architecture demands distributed ownership of results

How to Use For Marketers

Every piece of external content should visibly ladder up to at least one DNA anchor. If you can't name the anchor a headline serves, rewrite it.

Brand Purpose

Why We Exist

We exist to give people, businesses, and institutions the right to own what's theirs.

Data is the defining asset of modern life, it contains our health, our money, our identity, our work. Yet most of that data is owned by the platforms that store it, not the people who create it. Iagon exists to reverse that imbalance. Our purpose is not to build a cloud product, our purpose is to restore a right that was quietly taken. Everything we make is a means to that end.

Brand Promise

What We Deliver, Every Time

Enterprise-grade cloud services with compliance, sovereignty, and security built into the architecture, not bolted on after.

When a customer chooses iagon, they are not choosing a "decentralized alternative" to traditional cloud. They are choosing infrastructure where the things they used to fight for, regulatory compliance, data sovereignty, security, are structural properties of the system itself. No retrofitting. No compliance theatre. No security-as-a-service add-ons. The architecture does the work, every deployment, every region, every time.

Tone of Voice

A trusted expert who cares about the people on the other side.

Sage sets the register: rigor, evidence, composure. Caregiver sets the temperature: we write from the side of the person whose data it is. Five principles carry that voice into everything we publish.

No hype. No urgency.
No promises we cannot evidence.

01 Precise

A number instead of an adjective.
A named jurisdiction instead of "global".

"Granted patents in 15+ jurisdictions."

02 Composed

We never raise our voice.
No urgency, no superlatives, no fear.

"This runs in banking and healthcare environments today."

03 Protective

Every explanation answers one question: what happens to what is mine.

"The patient decides who opens the file, and every time it opens is recorded."

04 Respectful

The reader is competent, and their current setup was not a mistake.

"This runs in banking and healthcare environments today."

05 Accountable

We say what we can prove, and name plainly what we cannot.

"Independent security reviews of key components."

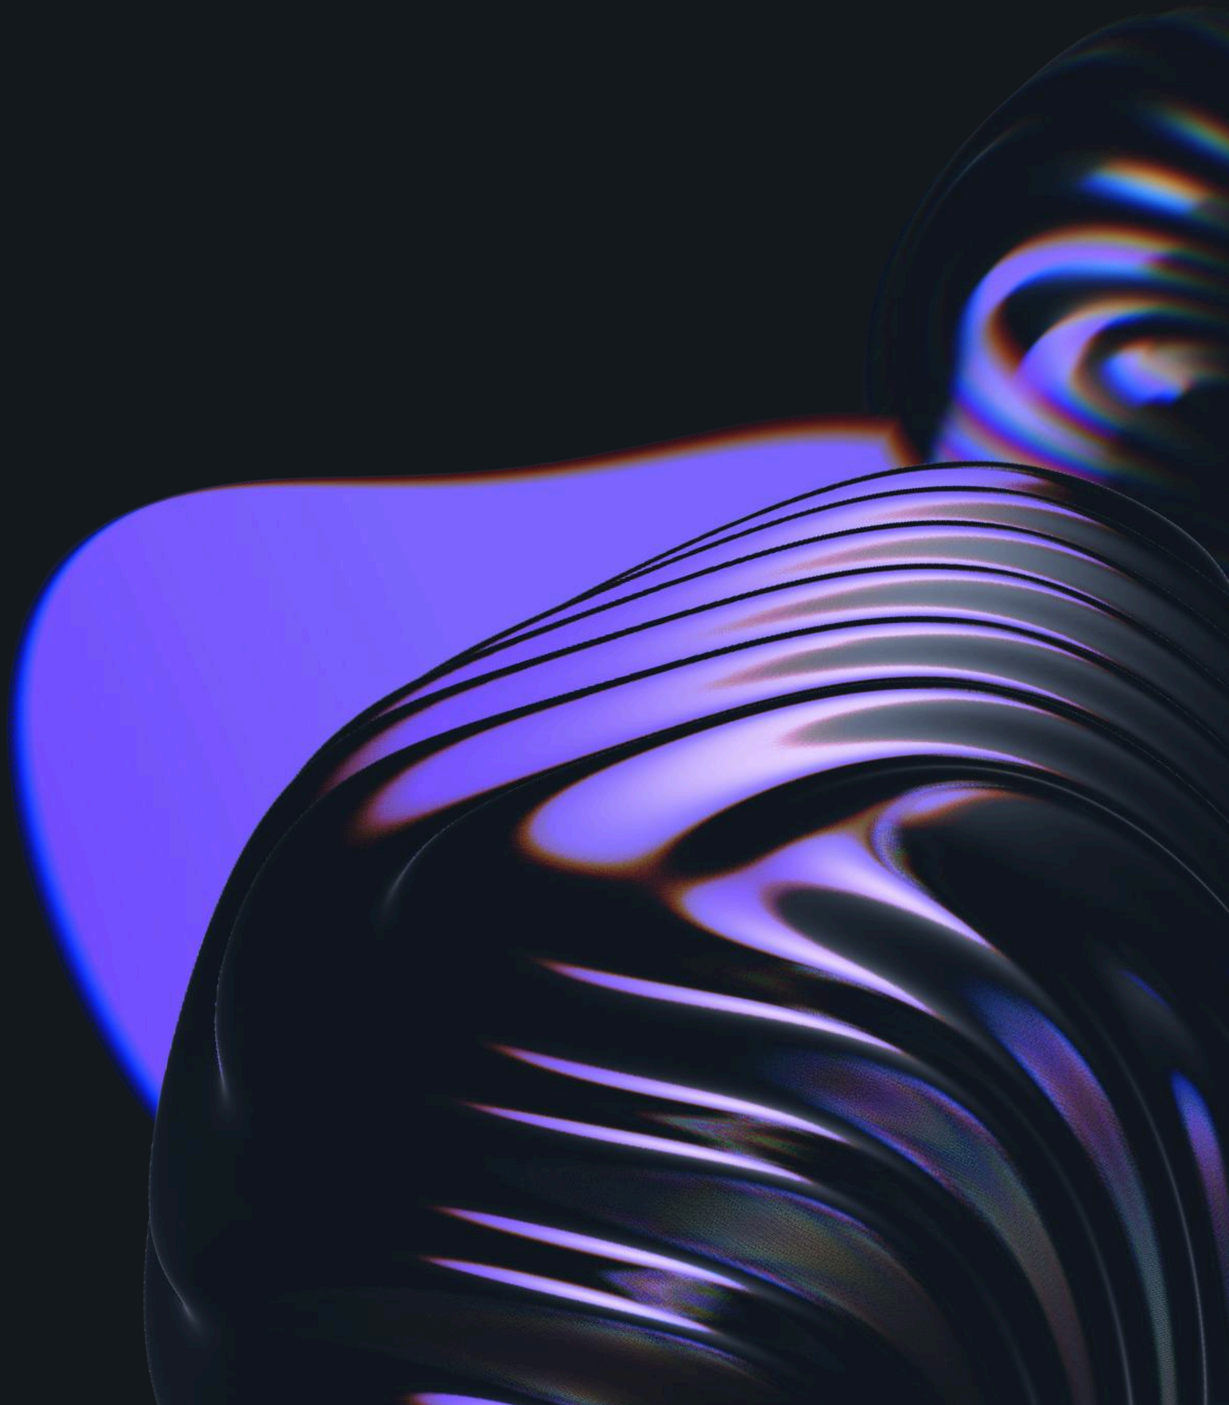

How to Use **Example**

“You set the compliance conditions. The network enforces them before data is placed.”

The voice in one sentence. A named actor, a specific mechanism, no adjective doing the work.

iagon

The Logo

Logo

Symbol

Wordmark

Our Logo

Our logo is our brand's most important element.
It is a unique and bold signifier of the iagon brand.

The wordmark must always be used together with the symbol, as shown above

Logo Brankit

Logo Proportions

The positioning and scale of each element in the logo has been meticulously crafted to reach best optical balance. **Never alter this proportions**

*1 the wordmark sits within the symbol inside line-cut,

*2 the space between logo and wordmark is the bowl of the letter “g”

01 Light Mode

02 Dark Mode

03 Accent Gradient

*1

*2

Stacked Proportions

The positioning and scale of each element in the logo has been meticulously crafted to reach best optical balance. **Never alter this proportions**

*1 - the wordmark sits within the symbol inside outline cut,

*2 - the space between logo and wordmark is the width of the letter “a”

Symbol

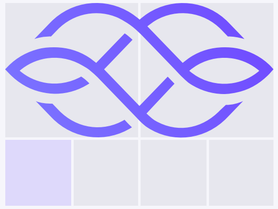

Our Symbol can be used by itself as dApp icon, official brand channels pfp, merchandise, or in strict correlation with iagon products (like on Cyclone or other products we might release)

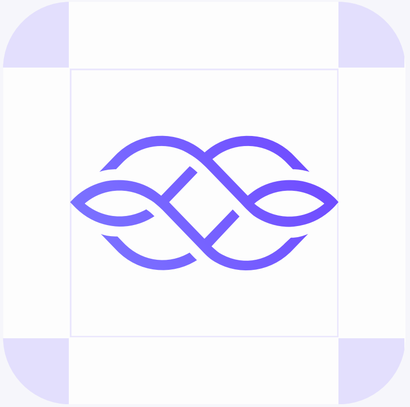

Pfp/ icon Clearspace

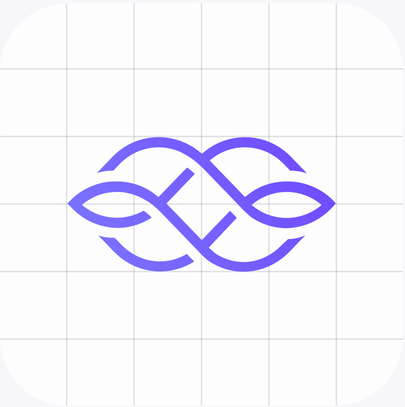

To ensure the right amount of breathing space around the symbol, you can calculate 1/4 of it's width, or use a 6x6 grid, and span our symbol to a 4x2 centered grid.
Tip: the same rule can be used for border radiuses

1/4

Clearspaces

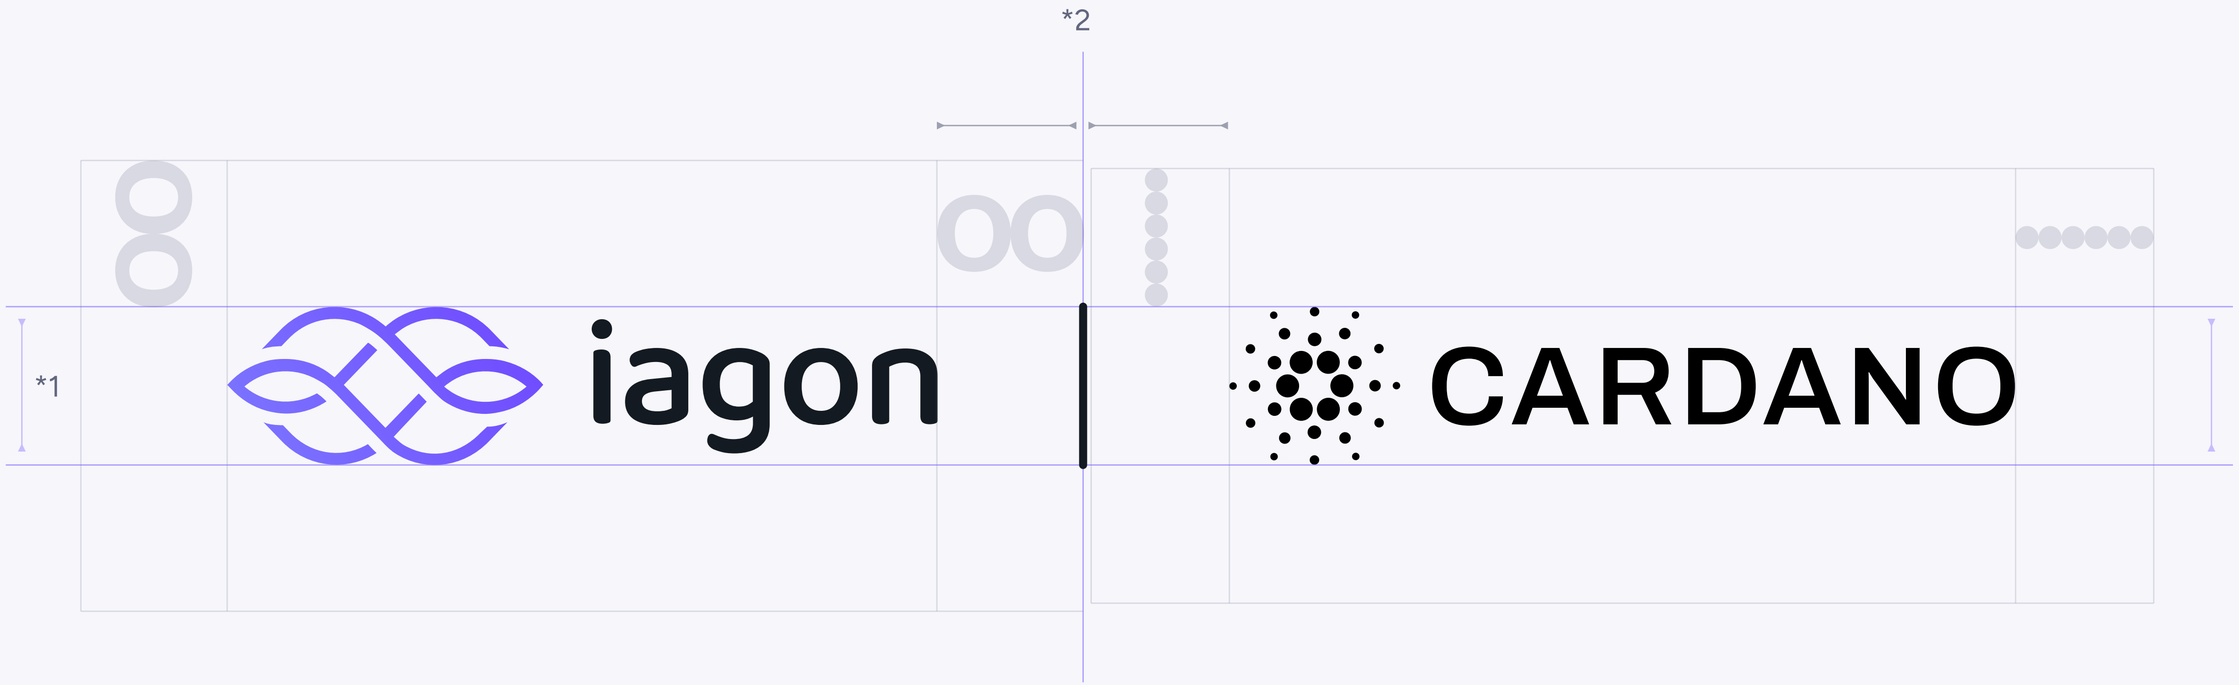

To ensure the right amount of breathing space around the iagon logo, use this easy steps:

Step 1
Pick the letter “o”

Step 2
Double it

x = oo

((From Cardano Brand Guidelines: Always maintain a clear space around the logo equal to the width of six dots from the starburst icon.))

Cobranding: A Clearspace Usage.

Each company logo will have different clearspace guidelines.
Logos should have the same real hight (*2), the same space to the separator (*1) all while keeping valid both clearspace minimum requirements

same space same space

Sub Logos

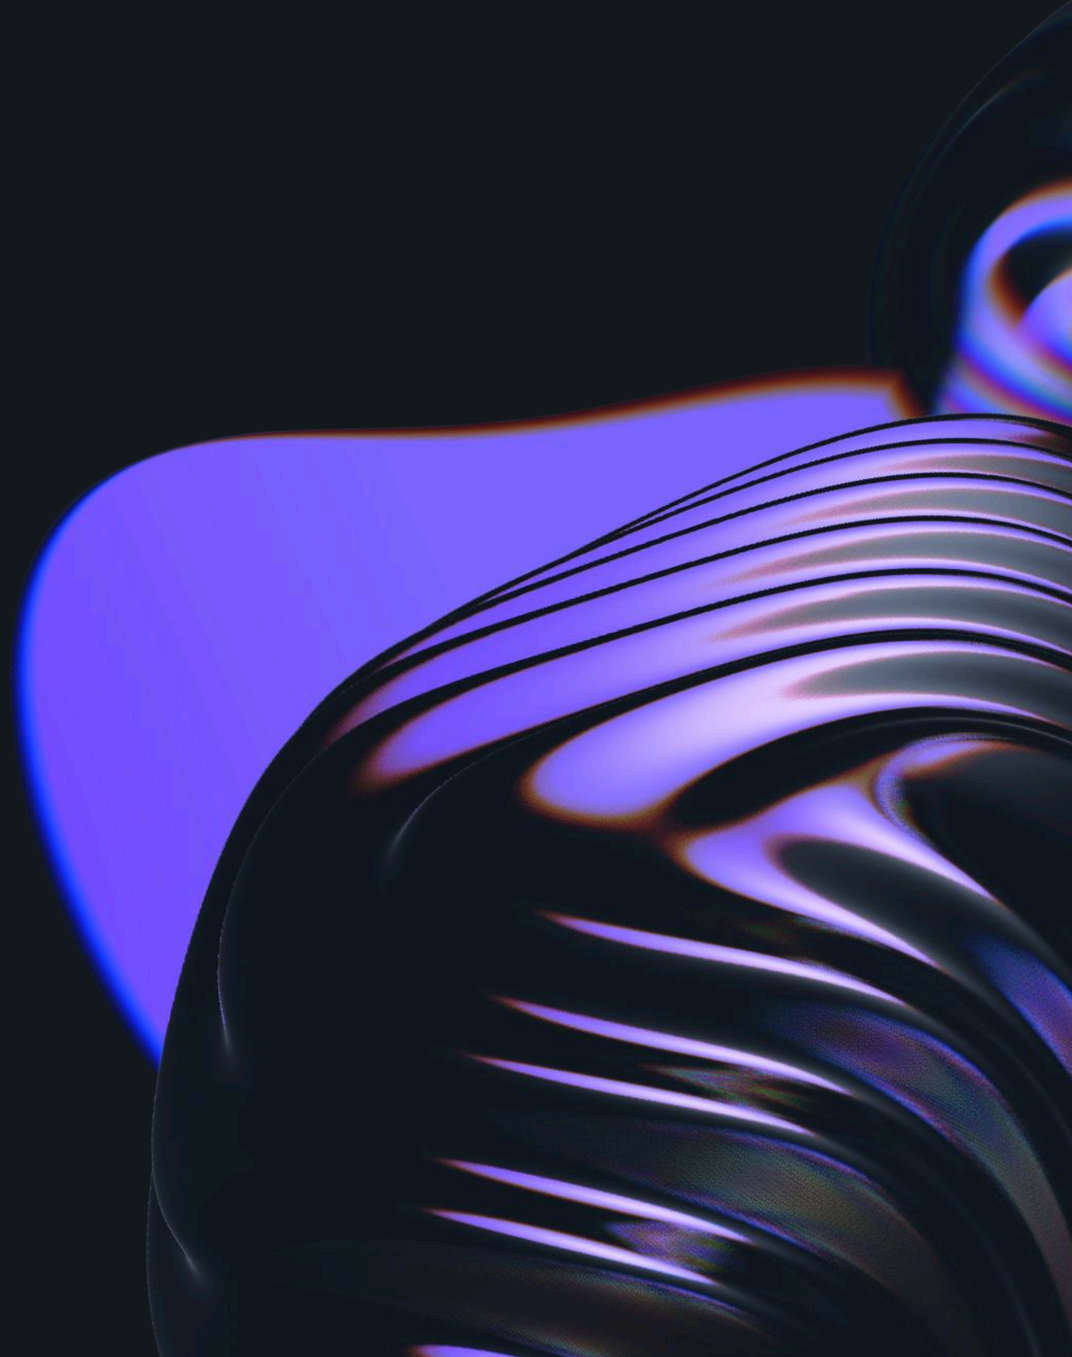

Most iagon applications will use this sub logo composition to keep brand consistency

Sub App wordmarks, are custom artworks based on Baboo, medium weight, -1% kerning

iagon

Brand Colors

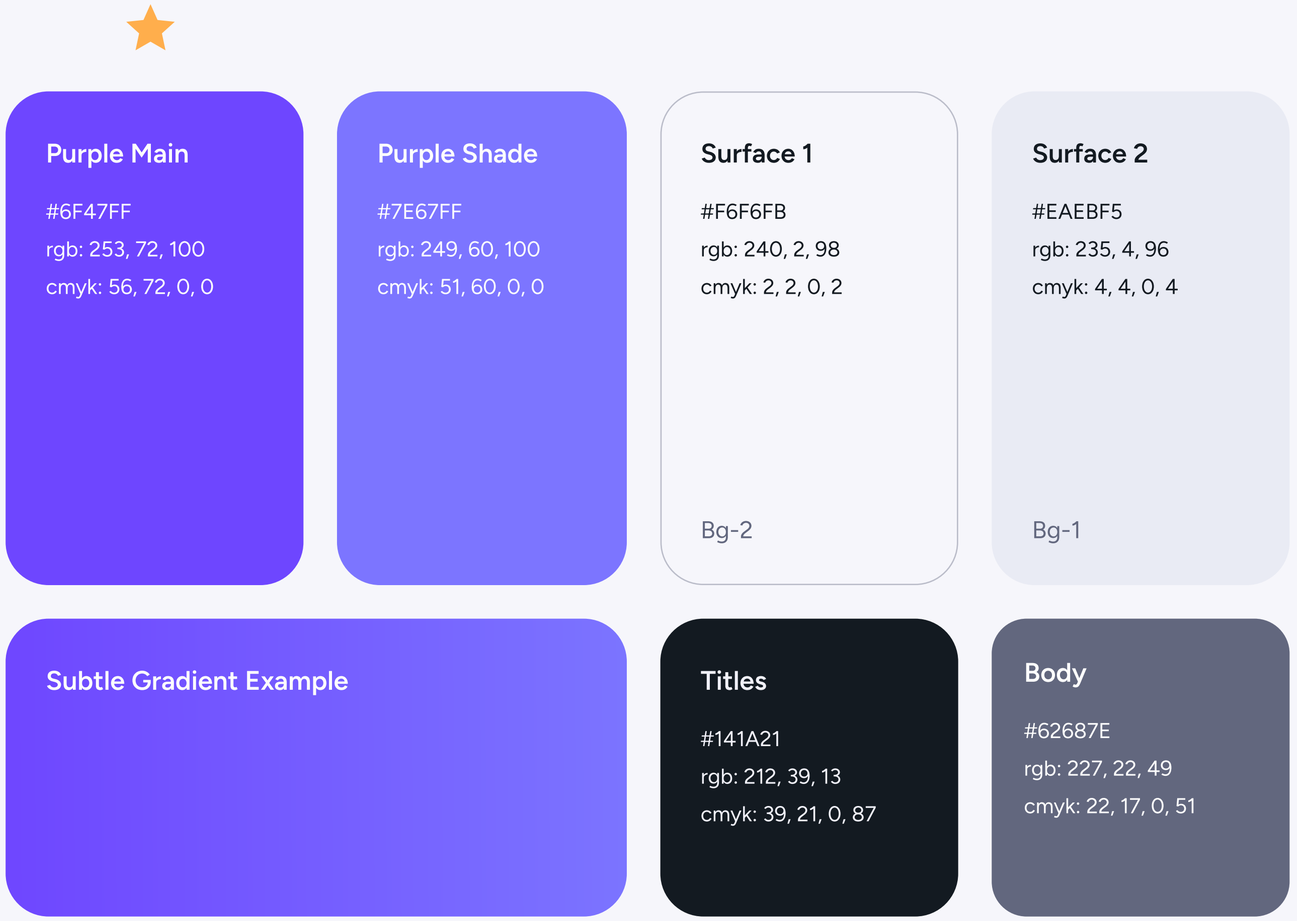

Primary Colors

iagon primary palette is simple, bold, and instantly recognizable. Our purple i s iagons' lead color, confident, trustworthy, and unmistakably us.

iagon Black and iagon White provide balance and contrast. They're used most often as main backgrounds to create clarity and legibility.

Can be used flat, or in combination with its lighter versions. For depth / premium gradient treatment

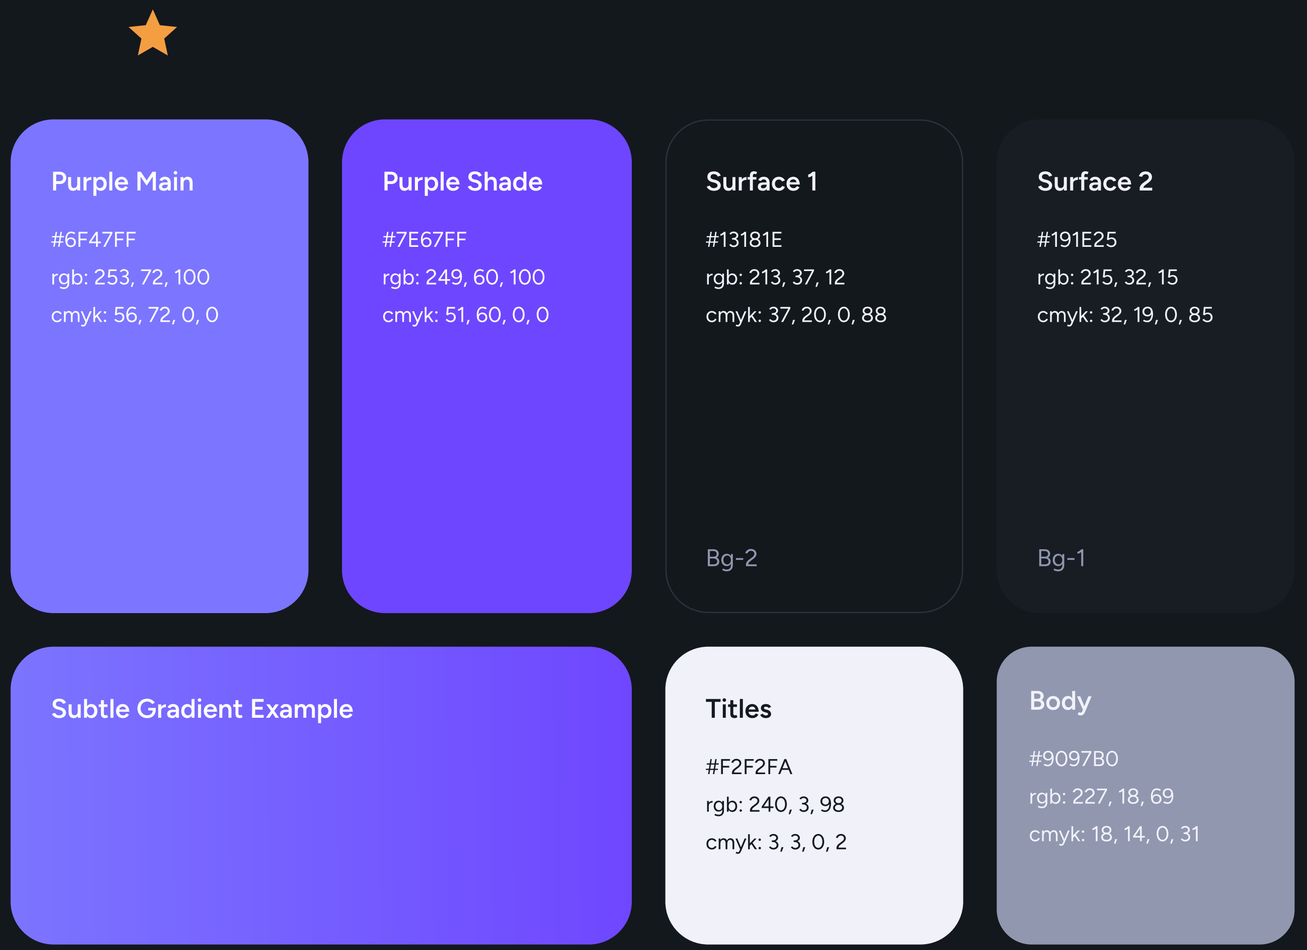

BG/FIll Main Purple AA - 5.2:1 Passes (4.5:1) AA contrast for all cases

DarkMode

For darkmodes or dark graphics materials, we will use a lighter purple as main color. This to ensure optimal readability and contrast on all surfaces

For big titles, surfaces and graphic elements we can keep using the gradient also in the darkmodes materials.

BG/Fill Main Purple AA - 4.9:1 Passes (4.5:1) AA contrast for all cases

Colors Balance

It’s important to maintain a balanced and harmonious usage of iagon brand palette. Our purple gradient, for example, should not be too predominant on any UI interface, or on any poster / online graphic.

Always favor light or dark backgrounds, and use our purples as accent colors to drive attention to the important bits of informations

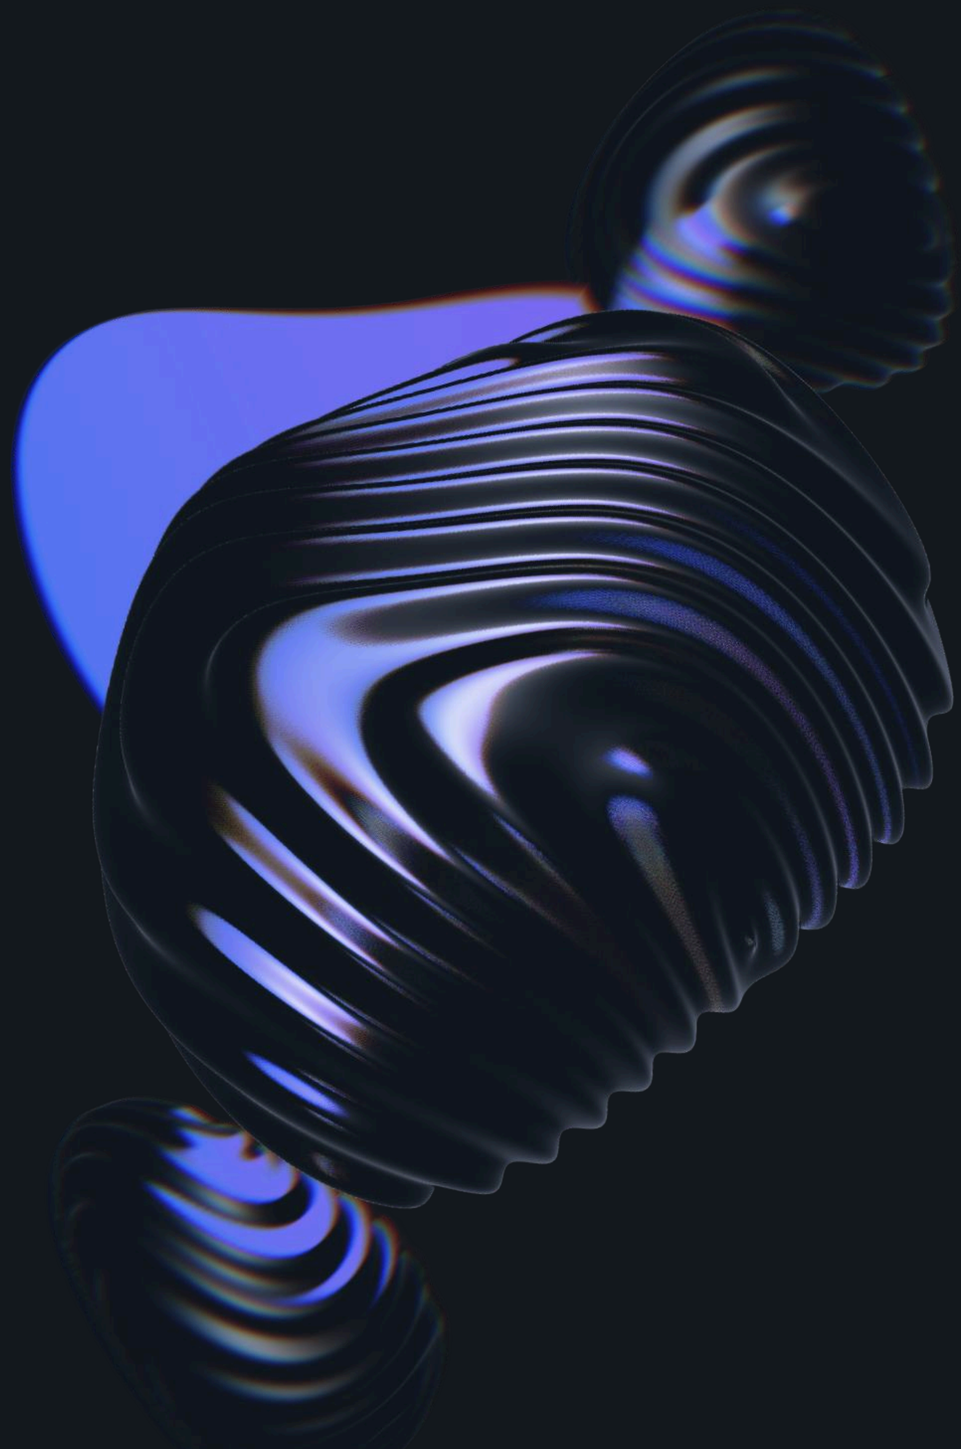

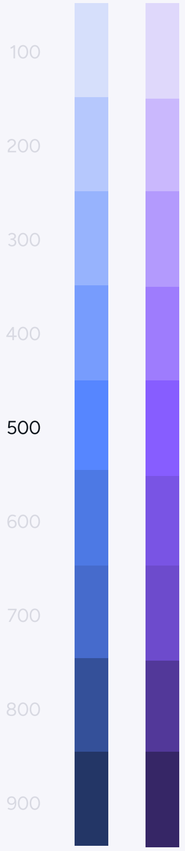

White Space Balance

Keep the design breathable, with loads of white space to enhance readability, and direct the users focus on important things.
